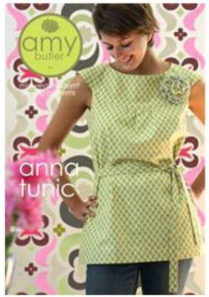
Yarn
What is yarn and how is it used?

Yarn is a long continuous length of interlocked fibres, suitable for use in the production of textiles, sewing, crocheting, knitting, weaving, embroidery, or ropemaking.[1] Thread is a type of yarn intended for sewing by hand or machine.

Textiles:

Cloth or fabric

Sewing: Putting textiles together to form different items such as:
Clothes, purses, pillows



Knitting
Crochet
VS
VERSUS BATTLE

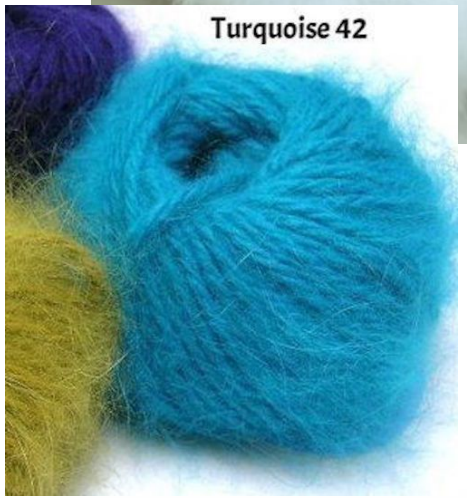
Embroidery & Rope Making

Cotton

Jute

Linen

Sheep Wool & Angora Rabbit



Man-made – Synthetic Fibres

- Nylon
- Polyester
- Acrylic
- Lycra (Elastomeric)

Fibers need to be prepared. Here is one way the cotton fibers are prepared. Another way could be removing the fibers from the animal or plant and clean or comb it. The best prepared fiber for a spinner is called “roving.”
